

# Bangor University Computer Science Department

## Exam Document Class

Cameron Gray <c.gray@bangor.ac.uk>

November 28, 2022

### Abstract

Starting with the 2016/17 academic year, the Computer Science department at Bangor University have moved to L<sup>A</sup>T<sub>E</sub>X for preparation of examination papers for all taught courses. This was done for multiple reasons, including the reduction of burden on support staff.

This package is the embodiment of that effort. It includes all of the elements needed to produce an examination paper, including examiner's copies with solutions included.

## 1 Usage - Class Options

The document class is activated (or loaded) using the usual L<sup>A</sup>T<sub>E</sub>X command `\documentclass{bangorexam}`. The class requires one of the following options to control which 'style' of exam paper is produced.

[`\langle ab \rangle`] - produces a compulsory Section A and a 'n-from' Section B exam. This type defaults to 2 required to match previous behaviour.

[`\langle aonly \rangle`] - produces a single section, all questions compulsory exam.

[`\langle nfrom \rangle`] - produces a single part 'n-from' exam.

The 'answers' option controls the inclusion of solutions as part of the output.

`\documentclass[ab]{bangorexam}` - produces the student form of a Section A/B exam paper.

`\documentclass[aonly]{bangorexam}` - produces the student form of an exam paper where all questions are compulsory.

`\documentclass[nfrom]{bangorexam}` - produces the student form of an exam paper with a single section but n-from the total questions.

`\documentclass[ab,answers]{bangorexam}` - produces the examiner form of the paper.

## 2 Usage - Preamble Macros

The class includes several macros that must be added to the document's preamble. These set important aspects such as the module code and title.

`\school{\langle English name \rangle}{\langle Welsh name \rangle}` The name of the school setting this exam, provided in both English and Welsh.

`\module{\langle code \rangle}{\langle full name \rangle}` The code (including the 3-letter prefix) and full name of the module.

`\examperiod{\langle resit|s1|s2 \rangle}` Specifies the period of the exam, s1 for January/End of Semester 1, s2 for May/End of Semester 2, or resit for Supplementary exams (Summer Resits).

`\timeallowed{\langle hours \rangle}` The amount of time allowed in hours. This should be the numerical part only, e.g. `\timeallowed{1\half}` or `\timeallowed{3}`.

`\nfrom{number}` The number of compulsory questions from the selection available in the options part of the exam.

### 3 Usage - Body Macros

Various macros exist to typeset the questions within the exam paper. The macros listed here are provided to comply with Bangor University's style and formatting requirements. Users should not adjust any formatting, font, header, footer, margin other other display parameters. Please use `\emph{}` for italic text and `\textbf{}` for boldface fonts only. The document class has been designed to support `amsmath` and `amssymb` mathematics typesetting with the conventional font.

`\sectiona`

*Only applies when class option ab is active.*

Begins the compulsory Section A.

`\sectionb`

*Only applies when class option ab is active.*

Begins the student-choice Section B.

`\pointsdesc{description}` Sets the suffix/descriptive text following a points value. This defaults to an empty string, so 5 points would be rendered as [5]. Setting `\pointsdesc{%}` would result in [*5%*].

`\guidance{guidance text}` Sets a 'guidance' paragraph at the beginning of all question sections (at the start for two of four or both of section A and B if ab).

`\guidancea{guidance text}` Sets a 'guidance' paragraph at the start of section A only.

`\guidanceb{guidance text}` Sets a 'guidance' paragraph at the start of section B only.

### 4 Usage - Environments

There are three key environments `questions`, `parts`, and `solution`. These represent a numbered sequence of questions, parts and sub-parts of one question, and a solution/answer for a question respectively.

#### 4.1 Questions Environment

All questions must be set within a questions environment. You may add other items, such as explanations, images, scenarios etc., in this environment too. The most simple questions environment is as follows:

```
\begin{questions}
\end{questions}
```

However, this will not actually produce any output. Questions must be added with use of the `\question` macro.

`\question[points]` This macro can only be used within the Questions environment and is used to typeset a question. The optional argument sets the number of points/marks/percentage awarded for correct answers. See the `\pointdesc` macro for customisation options. Whenever a new block is started (with `\begin{questions}`), the numbering begins at 1. (Questions, at present, can only be labelled with Arabic numerals.)

## 4.2 Parts Environment

Within a question, examiners may wish to have multiple sub-questions (a.k.a parts). This is provided for by the `\begin{parts}... \end{parts}` environment. Each sub-question or part is handled with the `part` macro.

`\part[points]` Part This macro can only be used within the parts environment and is used to typeset a sub-question. The optional parameter sets the number of points/marks/percentage awarded for correct answers. See the `\pointdesc` macro for customisation options.

The parts environment may only be used within the questions environment, as in the example below:

```
\begin{questions}
  \question Use the graph in Figure 1 to answer the following:
  \begin{parts}
    \part Sub-question 1
    \part[10] Sub-question 2
  \end{parts}
\end{questions}
```

Whenever a new block is started (with `\begin{parts}`), the sub-question numbering begins with a). (Sub-questions, at present, can only be labelled with English letters).

## 4.3 Solution Environment

Following either a `\question` or `\part`, the examiner should include a solution block. This block/environment will only be included if the `answers class` option is in effect. (See *Class Options* for more details). Any standard LaTeX content can be placed in a solution block. A minimal example is below:

```
\begin{questions}
  \question A really hard question.
  \begin{solution}
    The answer is placed here.
  \end{solution}
\end{questions}
```

## 5 Usage - Multiple Choice Questions

There are four environments that will allow typesetting of multiple choice selections depending on the desired layout. All must be used within a Questions or Parts environment. The first pair present a list of possible responses labelled with letters. The `choices` environment presents one choice per line, whereas the `horizontalchoices` environment lays out choices in a single paragraph, wrapping lines wherever necessary.

The second pair present tick or check boxes instead of labelled choices. A `checkboxes` environment will again typeset options one to a line, and the `horizontalcheckboxes` environment will present all options in one paragraph.

Within any of the four environments each choice is typeset using the choice macro. Please note; there is no points argument for individual choices, this should be handled at the question or part level.

- `\choice` Choice Text Typesets a single choice according to which environment it is placed in. Solutions to multiple choice questions are handled somewhat differently. Instead of a solutions environment, typeset the correct option using the `correctchoice` macro.
- `\correctchoice` Choice Text Typeset the correct choice based on where the macro is placed. When `answers` is in effect, the output of this macro will either highlight the option in boldface, or replace the checkbox with a tick.

## 6 The Code
