v1.0

**L^AT_EX support files for Softmaker
Broadway available at
<http://www.freefont.de>**

September 4, 2010

Package author:
Josef Kleber

This package offers L^AT_EX support files for the Softmaker Broadway fonts available at www.freefont.de in October 2008.

These support files were created with the `installfont` bash script, which is available in CTAN.

Attention

This package does **not** include the fonts (license restriction). They are or were available for free download at www.freefont.de, as well as part of some font collections of [Softmaker](#).

1 Broadway (October 2008)

1.1 Package options

The font style file offers the following options:

1.1.1 scaled

You can use the option `scaled` for scaling the font to better match with other fonts, e.g. `\usepackage[scaled=1.03,leading=1.05]{iceberg}`.

1.1.2 leading

For some fonts it might be necessary to increase the leading between lines for a better optical impression, where `1.0` means 100%.

1.2 The Font

First of all, you have to get the font. Download it for free at www.freefont.de or get it from [Softmaker](#). Copy the Postscript Type1 fonts `Broadway.pfb` and `Broadway-Engraved.pfb` to your local T_EX tree:

```
TEXMF:/fonts/type1/softmakerfreefont/Broadway/
```

Family	Series	Shape(s)	Example of Typeface	Supported Encodings
6bw	m	n	Broadway	OT1, T1, TS1
6bw	m	sl	<i>Broadway</i>	OT1, T1, TS1
6bw	m	sc	BROADWAY	OT1, T1, TS1
6be	m	n	Broadway Engraved	OT1, T1, TS1
6be	m	sl	<i>Broadway Engraved</i>	OT1, T1, TS1
6be	m	sc	BROADWAY ENGRAVED	OT1, T1, TS1

1.3 Installation

The following steps will show you the installation in the case of MiKTeX. For another T_EX distribution please take a look in its documentation.

- `get` [broadway.tds.zip](#)
- **extract it in the main directory of your local T_EX tree**
- **update the FileNameDataBase (FNDB) in MiKTeX Settings or with `initexmf -u1` on the command line**

¹for system-wide installations you have to add the `--admin` switch

- **include the map file**
 - **run** `initexmf --edit-config-file updmap`
 - **add** `Map` `broadway.map` **in the opening editor**
 - **save the file and close the editor**
 - **run** `initexmf --mkmaps`

1.4 Usage

If you want to typeset your complete document with the font Broadway simply add `\usepackage{broadway}` to your preamble. If not, simply add another font package after `\usepackage{broadway}`. You can switch to the font Broadway with the command `\FFBroadway`, which is a shortcut for:

```
\fontfamily{6bw}\fontseries{m}\fontshape{n}\selectfont
```

There is also the `\FFBroadwayEngraved` command for the engraved variant.
